#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art on pages 1-3 in view of Kawata (US Patent No. 6,076,171).

On pages 1-3, applicant admitted that it is known to turn off the backlighting of a conventional cellular phone having a display section and an input section during data inputting so as to save power. The conventional method is silent in changing the brightness of the display for power saving.

However, Kawata teaches to set the brightness of a display in a level based on the current operation mode of the device so as to reduce power consumption (see column 20 lines 35-63). Therefore, it would have been obvious for one of ordinary skill in the art at the time of the invention to reduce the brightness of the display as taught by Kawata in a conventional cellular phone during data inputting so as to reduce power consumption as suggested by kawata.

Consider claims 4 and 7. The conventional cellular phone include a data input

mode, a data display mode, and a communication status display mode.

Application/Control Number: 09/773,596

Art Unit: 2673

1)

Consider claim 5. A conventional cellular phone includes a plurality of functions including a voice communication function, a mailing function, a short-messaging function, a phone directory function, a scheduling function, and a game function. Consider claims 11 and 18. It would have been obvious for one of ordinary skill in the art at the time of the invention to include a brightness change mode and a no-change mode so as to provide the user choices based on the user's preference.

Consider claims 14-15. It would have been obvious for one of ordinary skill in the art at the time of the invention to use a plurality of resistor and LEDs to control the brightness level so as to simplify the driving circuit and lower the cost of the device. The examiner takes Official Notice that it is well known in the art to use LEDs for backlighting a display device.

#### Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sakaguchi (US Patent No. 6,141,568) teaches a portable telephone having power saving function.

Ando (US Patent No. 6,021,502) teaches to reduce the brightness of a monitor when no input is entered from a keyboard so as to reduce power consumption (see column 1 lines 35-44).

Art Unit: 2673

Pontarelli (US Patent No. 5,696,952) teaches to reduce brightness or turn off a display so as to reduce power consumption (column 1 lines 2-58).

Ge (US Patent No. 6,369,867) teaches using LEDs as a light source for backlighting a display device.

#### **CONTACT INFORMATION**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kent Chang whose telephone number is 703-305-4824. The examiner can normally be reached on Monday to Thursday from 9:00 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bipin Shalwala, can be reached at 703-305-4938.

## Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

#### or faxed to:

(703) 872-9314 (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA, Sixth Floor (Receptionist).

Application/Control Number: 09/773,596

Art Unit: 2673
